

What is claimed is:

1. A fabrication method of an oral care composition comprising the steps of:

- a) drying a *Cimicifuga* root;
- 5 b) soaking the dried *Cimicifuga* root in a vinegar for a predetermined time period;
- c) drying the vinegar-soaked *Cimicifuga* root;
- d) admixing the vinegar-soaked then dried *Cimicifuga* root, a salt and a water at a sequential weight ratio of about 10% to 40%, about 10% to 40% and 10 about 30% to 50%;
- e) evaporating the admixture of the *Cimicifuga* root, the salt and the water to obtain a *Cimicifuga*-salt concentration; and
- 15 f) removing *Cimicifuga* root fibers from the *Cimicifuga*-salt concentration.

2. The method of claim 1 wherein said each step is performed within a non-metallic container.

20

3. The method of claim 1 wherein said each drying step

- a) and c) is performed on an oak panel layered over a heated floor.

4. The method of claim 1 wherein, in the step d), the sequential weight ratio of the vinegar-soaked then dried *Cimicifuga* root, the salt and the water is about 40%, about 30%, and about 30%.

5

5. The method of claim 1 wherein the vinegar is a fermentation from a brown rice.

10 6. The method of claim 1 further comprising, after the step f), adding a filler material to the *Cimicifuga*-salt concentration.

15 7. The method of claim 6 wherein the filler material comprises a sodium chloride.

8. The method of claim 1 wherein the composition is one selected from a toothpaste, a mouth detergent, a mouthwash, a chewing gum, and a gum massage cream.

20 9. A fabrication method of an oral care composition comprising the steps of:

- a) drying a *Cimicifuga* root and a *Coptis* root;
- b) admixing the dried *Cimicifuga* root and the dried *Coptis* root at a substantially equivalent ratio in weight;

25

- c) soaking said each dried *Cimicifuga* and *Coptis* root in a vinegar for a predetermined time period;
- d) drying the vinegar-soaked *Cimicifuga-Coptis* root admixture;
- 5 e) admixing the vinegar-soaked then dried *Cimicifuga-Coptis* root admixture, a salt and a water at a sequential weight ratio of about 10% to 40%, about 10% to 40% and about 30% to 50%;
- f) evaporating the admixture of the *Cimicifuga-Coptis* root admixture, the salt and the water to obtain a *Cimicifuga-Coptis*-salt concentration; and
- 10 g) removing *Cimicifuga* root fibers from the *Cimicifuga-Coptis*-salt concentration.

15 10. The method of claim 9 wherein, in the step e), the sequential weight ratio of the vinegar-soaked then dried *Cimicifuga-Coptis* root, the salt and the water is about 40%, about 30%, and about 30%.

20 11. The method of claim 9 wherein, in the step e), the sequential weight ratio of the vinegar-soaked then dried *Cimicifuga-Coptis* root, the salt and the water is about 20%, about 40%, and about 40%.

12. The method of claim 9 wherein said each step is performed within a non-metallic container.

13. The method of claim 9 wherein said each drying step
5 a) and d) is performed on an oak panel layered over a heated floor.

14. The method of claim 9 wherein the vinegar is a
fermentation from a brown rice.

10 15. The method of claim 9 further comprising, after the
step g), adding a filler material to the *Cimicifuga*-
salt concentration.

15 16. The method of claim 15 wherein the filler material
comprises a sodium chloride.

20 17. The method of claim 9 wherein the composition is one
selected from a toothpaste, a mouth detergent, a
mouthwash, a chewing gum, and a gum massage cream.

18. An oral care composition comprising:
25 a) a *Cimicifuga* root and a *Coptis* root each
 substantially dried, soaked in a vinegar, and then
 dried for a predetermined time period, wherein the

dried, vinegar-soaked and then dried *Cimicifuga* root and *Coptis* root are formed at a substantially equivalent ratio in weight; and

5 b) a salt and a water, wherein the dried, vinegar-soaked and then dried *Cimicifuga-Coptis* root, the salt and the water are admixed at a sequential weight ratio of about 10% to 40%, about 10% to 40% and about 30% to 50%, wherein the admixture is evaporated to a *Cimicifuga*-salt concentration, 10 wherein *Cimicifuga* root fibers are removed from the *Cimicifuga*-salt concentration to form the oral care composition.

15 19. The oral care composition of claim 18 wherein the vinegar-soaked then dried *Cimicifuga* root, the salt and the water is about 40%, about 30%, and about 30%.

20 20. The oral care composition of claim 18 wherein the vinegar-soaked then dried *Cimicifuga* root, the salt and the water is about 20%, about 40%, and about 40%.

25 21. The method of claim 18 wherein the vinegar is a fermentation from a brown rice.
